**Shaarei Zedek Hospital, Jerusalem, Israel**  
**Stent Used: Over and Under PCS 4.0 x 18**

**Case Description:**

- 71 old year patient, with Class 2 stable angina , hypertensive, diabetic, hypercholesterolemia, with prior CABG and PCI intervention in the target graft with a prior stent deployment presented an 80% stenosis on the SVG associated with an aneurysm.
- A 4.0 X 18 MM pericardium covered stent was deploy successfully treating the lesion and excluding the aneurysm.
- Patient remained asymptomatic on a clinical 6 month follow up.

Pre Intervention

Stent across the lesion

Post Intervention
